Infor™ ERP VISUAL Extensions

Data Dictionary

for version 7.0.0

\$940 (USD)*

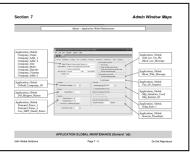

The Data Dictionary is a must-have tool for working with Infor ERP VISUAL data. This comprehensive product continues to satisfy the technical user's thirst for in-depth database information. Through many revisions over 15 years, this hand-compiled product meticulously documents the internal structure of the Infor ERP VISUAL database.

Benefits

- Gain valuable insight into Infor ERP VISUAL for report writing, exporting, and importing
- Easily map out queries

Features

- Over 1,700 pages in three spiral-bound volumes
- Microsoft SQL Server database centric
- Documents all core components of Infor ERP VISUAL which utilize the standard database
- Relational models diagram the relationships between tables in logical functional areas
- Table of foreign keys sorted by both master and detail
- List of all columns throughout the database
- Defines naming conventions for tables and columns
- List of all Infor ERP VISUAL reports and their respective file names
- Over 600 window maps describe where each data element is stored (pictured above)
- Table definitions detail each table's columns, indexes and triggers (pictured right)
